

DLMS Financial

Module 5F

Course Structure

Module 1 -- Introduction to the DLMS

**Module 2 -- Electronic Data Interchange
(EDI) Basics**

Module 3 -- DLMS Implementation Strategy

**Module 4 -- ASC X12 EDI Definitions and
Concepts**

Module 5 -- DLMS EDI

Module 5F-- DLMS Finance

Module 5M - DLSS/DLMS Mapping

Module 6 -- XML & Emerging Technologies

Module 5F Objectives

Students will gain basic understanding of:

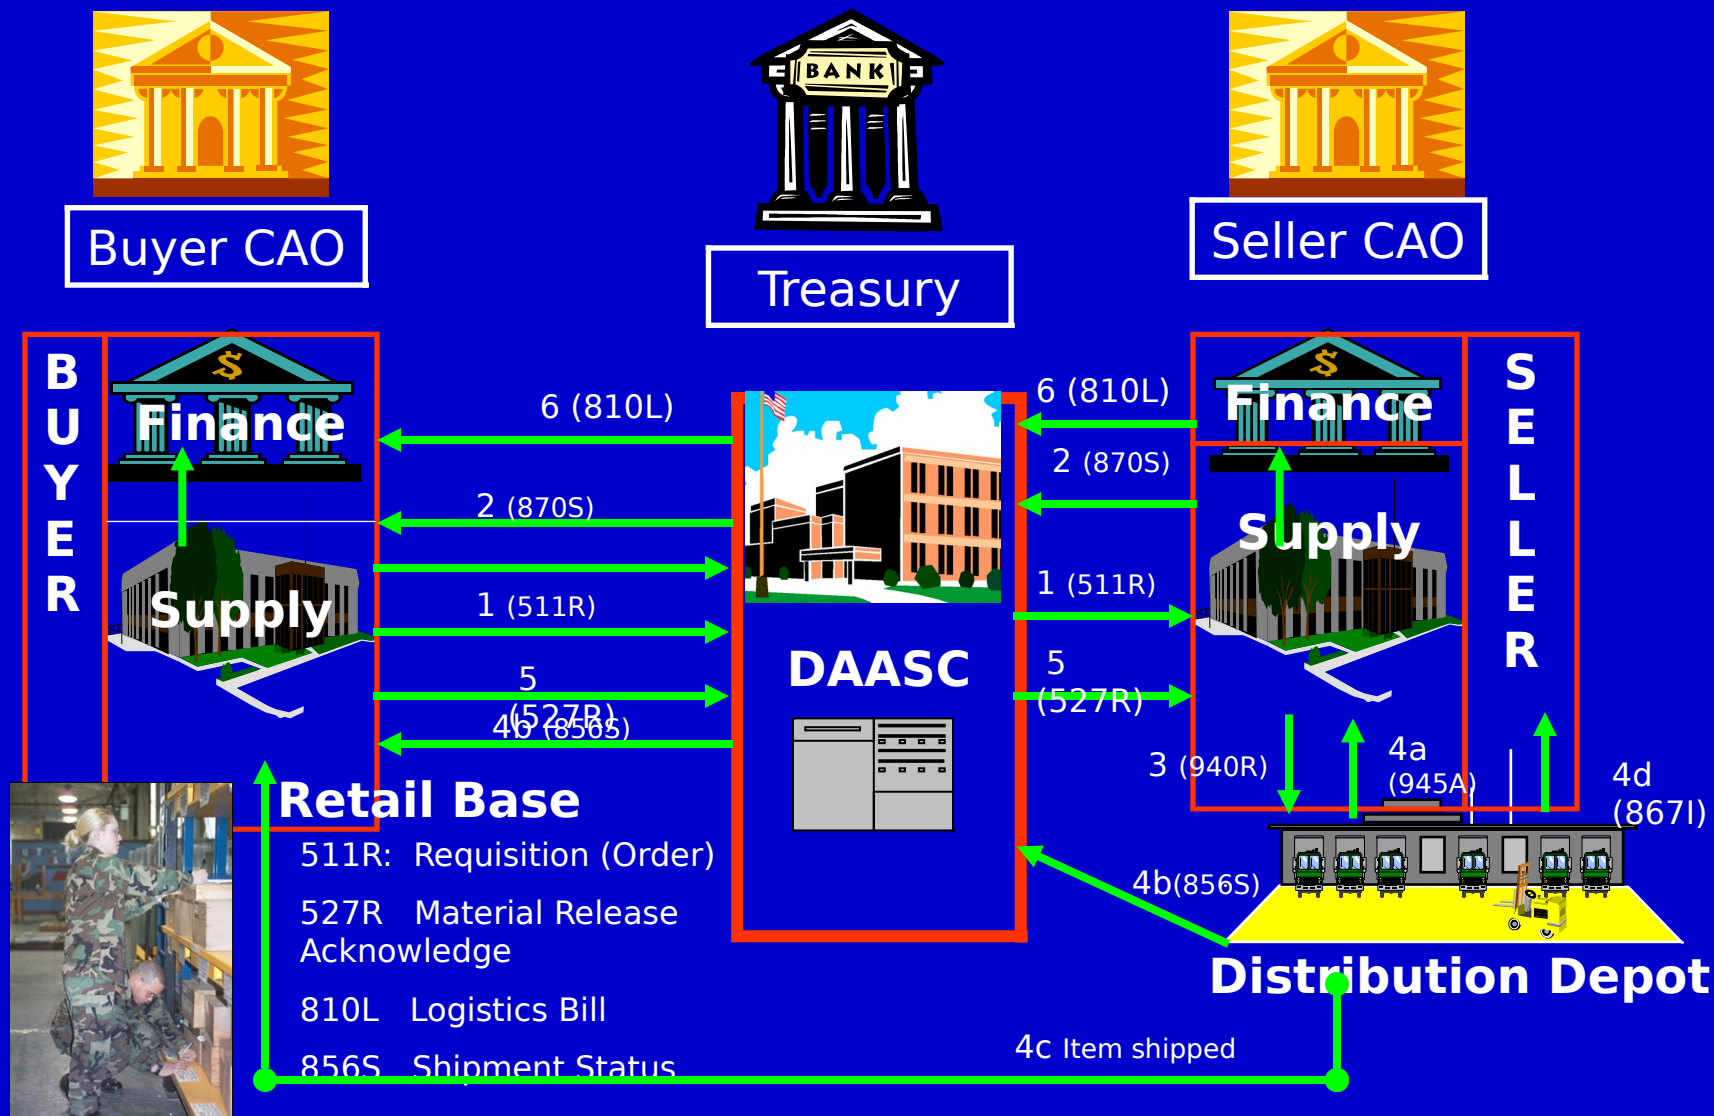

- **Supply and financial transaction process relationships**
- **The purpose and content of the Federal ICs used in the DLMS Financial Transactions**
- **The major DLMS financial concepts and processes associated with the transactions**
- **Introduction to the DLMS 810L, 812R and 812L**
- **Introduction to DLSS/DLMS data maps**

Module Structure

DLMS 5F, Financial

- **Order Processing Recap**
- **DLMS Financial and Associated Processes**
- **Key Concepts associated with DLMS Financial Transactions**
- **DLMS Billing Transaction Flow**
- **DLMS Billing Adjustments Transaction Flow**
- **DLSS to DLMS Transaction Cross Reference**
- **DLMS 810L Logistics Bill, 812R Billing Adjustment Request and 812L Billing Adjustment Request Reply**
- **MILS to DLMS Data Element Mapping**
- **Reading Approved DLMS Changes**
- **Quiz**

ORDER SUBMISSION AND FULFILLMENT

ORDER SUBMISSION AND FULFILLMENT

- **Many financial events occur during these processes**
 - ✓ Obligation of the requisition/order
 - ✓ Seller's acceptance of the order and the creation of an undelivered order.
 - ✓ Seller's issue of the material (reimbursement earned)
 - ✓ Buyer's receipt of the material (payment due)
 - ✓ Buyer's acceptance for vendor shipments.
- **The data external to finance and needed during the billing process is provided by or derived from transactions used in these and other processes**

Billing and Interfund Reimbursement

- **The issue of material on a reimbursable basis ends the order fulfillment process and begins the billing and reimbursement process.**
 - ✓ **Interfund.** The interfund billing process is the preferred and predominate reimbursement system used within logistics.
 - **It is both an automated billing process and a means by which the seller can immediately reimburse his/her organization from the funds identified by the buyer on the order. A point of sale (POS) debit transaction.**
 - **In this sense, for the buyer, the bill is really a bill and a notice of funds withdrawn (payment) from his account. Buyer must accept a billing or charge and may seek adjustment if needed.**
 - **Treasury transfers the funds between the buyer's and seller's accounts and notifies both parties of the transfer**
 - **The buyer must accept the seller initiated funds transfer and, if needed, apply for an adjustment.**

Important DLMS Financial Concepts

- **Collaborative Processes.**
 - ✓ DLMS financial processes and transactions are determined and managed by the DLMS Finance Process Review Committee.
 - The committee includes representatives from the military departments, DFAS, Defense Agencies, GSA, FAA, and NOAA.

Important DLMS Financial Concepts

- **Essential Information**
 - ✓ Who is the Customer?
 - ✓ Who is the Supplier?
 - ✓ Who gets the Bill?
 - ✓ What Product/Service was provided?
 - ✓ What was the value?
 - ✓ What financial account should be debited?
 - ✓ What financial account should be credited?

DLMS Financial Concepts

- **DLSS 80 Character Fixed Length Transactions**
 - ✓ Limit Data Content Conveyed in Transactions
 - ✓ Necessary Data is Derived by Association of Data Codes in Transactions with Business Rules and Tables
 - Service Agency Code
 - Signal Code
 - Fund Code

DLMS Financial Concepts

- **FUND CODES.**

- ✓ The fund code and other data on a requisition, in conjunction with the Fund Code Table,
 - Identifies the appropriation chargeable. *The service code of the billed office DODAAC determines which section of the table to use to identify the appropriation chargeable.*
 - Identifies the office chargeable (billed office) when the signal code is "C" or "L. *The service code of the requisitioner DoDAAC determines which section of the table to use to identify the billed DODAAC.*
- ✓ Each Service and Agency has identified a fund code coordinator to assign and manage it's series of fund codes.
 - DFAS serves as the representative for most Defense Agencies.
 - GSA coordinates the codes of Federal Agencies
- ✓ The official fund code table is maintained by DAASC

Signal Code

A01 SMS 3 5960-00-806-0292 EA 00002 W81WRD-6182-0005 R YN0E01 **C 21**

No/UI/Oty/DocNo/Demand/SupAdd/Signal/Fund/Dist/Proj/Priority/RDD/Advice

- **Designates which data fields contain the intended consignee (ship-to) and the activity to receive and effect payment of bills, when applicable.**
- **When material is to be shipped to activity identified in document number (rp 30-35), Signal Code will be:**
 - ✓ Code A – Bill to activity in 30-35
 - ✓ Code B – Bill to activity in 45-50
 - ✓ **Code C – Bill to activity in 52-53**
 - ✓ Code D – No billing required - free issue
 - ✓ Code W – Intra-Service use only
- **When material is to be shipped to the activity identified in the Supplemental Address (rp 45-50), Signal Code will be:**
 - ✓ Code J – Bill to activity in rp 30-35
 - ✓ Code K – Bill to activity in 45-50
 - ✓ Code L – Bill to activity in rp 52-53
 - ✓ Code M – No billing required – free issue
 - ✓ Code X – Intra-Service use only

- **DoD 4000.25-7-M, Military Standard Billing System (MILSBILLS) prescribes use of Fund Code in the interfund billing system.**

- ✓ **Fund Code equates to appropriation**
- ✓ **Specific Fund Codes require billing under non-interfund procedures**
- ✓ **Conversion for any given fund code is dependent upon the Service Code of the billed office:**

Fund Code to Fund Account Conversion Table (as of 1 Sep 2007)

Billing and Interfund Reimbursement

- Key features of the interfund
 - ✓ Seller's Central Accounts Office
 - Reports the funds transfer to Treasury
 - Only authorized to report transfers for bills which passed DLMSO prescribed DAASC edits
 - Notifies the buyer's accounts office of the transfer by sending a summary billing record to the accounts office
 - ✓ Buyer's Central Accounts Office
 - Ensures that the buyer processes the payment
 - ✓ The Buyer must process the charge
 - Use adjustment procedures to request adjustment of charges

Billing and Interfund Payment

Replies to the Requests for Adjustment

- Billings offices must reply to requests for adjustments and follow-up requests
 - ✓ Use the automated transactions prescribed
 - ✓ Sent to the office identified in the request
 - ✓ The actual financial adjustment or refund is provided as part of the normal billing process
 - Sent to the TAC 3 of the DoDAAC originally charged (TAC 1 if no TAC 3 exists.
 - Same as the amount originally charged

Buyer CAO

Treasury

Seller CAO

DLMS Standard Financial Data FA1/FA2 Segments

- **FA1/FA2 segments may be used to pass financial accounting and appropriation data in an X12 transaction.**
 - ✓ The segments can send appropriation related data as discrete data elements.
 - ✓ Within DLMS, the minimum data required in the FA2 is the basic appropriation (Dept. Index, fiscal year, account symbol, and limit/subhead)
 - The basic appropriation is currently passed as a single text string. *Most DoD systems cannot yet handle appropriation data passed as discrete data elements*

Standard Financial Information Structure (SFIS)

- The Common Business Language of DOD supporting:
 - ✓ **Information and data requirements for budgeting, financial accounting, cost/performance management, and external reporting across the enterprise.**
 - **SFIS standardizes financial reporting across DoD, thereby reducing the cost of auditability.**
 - **It allows revenues and expenses to be reported by programs that align with major goals versus by appropriation categories.**
 - **It enables decision-makers to efficiently compare programs and their associated activities and costs across DoD.**
 - **And, it provides a basis for common valuation of DoD programs, assets, and liabilities.**
 - ✓ **For more and current SFIS resources & information go to:**

http://www.defenselink.mil/dbt/sfis_resources.html

DLMS 810L, Logistics Bill

810 Invoice

Functional Group=IN

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

Federal Note:

DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/f-6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. Use a single occurrence of this transaction set to bill or provide adjustments for one or more items provided to a single paying (bill-to) office under DLMS procedures.
2. Users operating under the Defense Logistics Management system (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at <http://www.dla.mil/f-6/dlms>.
3. Finance and accounting offices, invoicing (billing) offices and other offices use this transaction set to forward DoD Defense Logistics Management System (DLMS) invoices for material and related services exchanged between DoD components and other participating Federal Agencies.
4. The transaction set may include multiple allowances and charges related to those lines of billing or to the invoice as a whole. Use one occurrence of this transaction set to transmit single or multiple transactions.
5. The total number of IT1 and SAC segments may not exceed 495.
6. This DLMS Supplement contains:
 - a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - d. Data elements which have an expanded files size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
7. This transaction may be used to provide Unique Item Identifier (UII) information. Refer to the UII web at URL: <http://www.acq.osd.mil/dpap/sitemap.html> for DoD policy and business rules.
8. This DLMS Supplement incorporates the Proposed DLMS Change and Approved DLMS Change (ADC) listed. PDC/ADCs are available from the DLMSO website: <http://www.dla.mil/f-6/dlmso/library/Changes/processchanges.asp>
 - ADC 77, Air Force Unique Management Coding for Materiel Management Aggregation Code (MMAC)
 - ADC 154, Inclusion of Data Supporting UID of Items on Logistics Bills (DLMS Supplement 810L)
 - ADC 274, DLMS and DLSS Changes to Support Army Exchange Pricing

Heading:

LOOP ID - N1

200

810L, Logistics Bill

- PURPOSE:
 - ✓ Use to bill for sales of material, reimbursable logistics services, and related refunds between DoD Components and participating Federal Agencies
- DLMS enhancements
 - ✓ Full line of accounting data as discrete data
 - ✓ Unique item identification
 - ✓ Point of Contact information

DLMS 812R Supplement Billing Adjustment Request

812 Credit/Debit Adjustment

Functional Group=CD

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Credit/Debit Adjustment Transaction Set (812) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to notify a trading partner of an adjustment or billback and may be used to request an adjustment or billback. It identifies and contains the details and amounts covering exceptions, adjustments, credits, or debits for goods or services. This transaction set is multi-directional between trading partners.

Federal Note:

DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/j-6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. Users operating under the Defense Logistics Management system (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table, and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at <http://www.dla.mil/j-6/dlms>.
2. Organizations use this transaction set to request, cancel or followup on a request for adjustments to specific interfund and noninterfund invoices or request a duplicate copy of the invoice. In the reply to this request for interfund adjustments, the billing office will notify the requester of its decision with a TS 812 adjustment reply, but the actual adjustments will appear as a credit in a TS 810 Invoice. For noninterfund adjustments, the billing office's reply will also be sent with a TS 812 Adjustment Reply. The reply will inform the billed office of the approved adjusted payment to be sent to the billing office.
3. Use a single occurrence of this transaction set to transmit one or more requests for adjustment of detailed billing records from a single invoice.
4. Use only Table 1 for a duplicate invoice copy request.
5. This DLMS Supplement contains:
 - a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - d. Data elements which have an expanded files size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
6. This revision to the DLMS Supplement (DS) incorporates Proposed DLMS Change (PDC) and Approved DLMS Change (ADC) listed. PDCs/ADCs are available from the DLMSO website: <http://www.dla.mil/j-6/dlms/elib/Changes/processchanges.asp>

- ADC 275, Administrative Changes to Eliminate Override Procedures for DLMS Supplements 812L, Logistics Bill Adjustment Request Reply and 812R, Logistics Bill Adjustment Request (Finance)

Billing Adjustment Request (812R)

- Use to request, cancel, or follow-up on a request for adjustment of a Logistics Bill
- Use to request or follow-up on a promised (validated) discrepancy report adjustment for
 - ✓ Supply Discrepancy- Reply promised Financial Adjustment
 - ✓ Product Quality Discrepancy- Report Accepted
 - ✓ Transportation Discrepancy – Report Accepted
- Used to follow up on promised credit for material return
- Use to request copies (retransmission) of bills
 - ✓ Only Table 1 is used to request a copy of a bill.
- We use our DLMS billing adjustment codes in the LM/LQ segments rather than the CDD segment to identify the reason for the adjustment

812 Credit/Debit Adjustment

Functional Group= CD

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Credit/Debit Adjustment Transaction Set (812) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to notify a trading partner of an adjustment or billback and may be used to request an adjustment or billback. It identifies and contains the details and amounts covering exceptions, adjustments, credits, or debits for goods or services. This transaction set is multi-directional between trading partners.

Federal Note:

DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/j-6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

- Users operating under the Defense Logistics Management system (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table, and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at <http://www.dla.mil/j-6/dlms>.
- Organizations use this transaction set to reply to specific interfund or noninterfund invoice adjustment (TS 812) requests or followups. Billing office replies for interfund adjustments are informational with the official approved adjustments appearing in a TS 810 Invoice.
- Use a single occurrence of this transaction set to transmit adjustments to one or more organizations. Use one occurrence of this transaction set to transmit single or multiple transactions.
- This DLMS Supplement contains:
 - Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - Data elements which have an expanded files size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
- This revision to the DLMS Supplement (DS) incorporates Proposed DLMS Change (PDC) and Approved DLMS Change (ADC) listed. PDCs/ADCs are available from the DLMSO website: <http://www.dla.mil/j-6/dlms/eLibrary/Changes/processchanges.asp>

- ADC 275, Administrative Changes to Eliminate Override Procedures for DLMS Supplements 812L, Logistics Bill Adjustment Request Reply and 812R, Logistics Bill Adjustment Request (Finance)

Overview of DLMS 812L Supplement Billing Adjustment Reply

Reply to Billing Adjustment Request (812L)

- **Use to reply to requests or reply to follow-up on a request for adjustment of a Logistics Bill**
 - ✓ We use our DLMS billing status codes in the LM/LQ segments to identify actions taken
 - ✓ Replies can be directed to other than the requesting party
- **DLMS Enhancements**
 - ✓ Full line of accounting data as discrete data
 - ✓ Point of Contact information

DLMS 810L, Logistics Bill

TRANSACTION SET

DLMS Supplement to Federal IC 810L Logistics Bill ADC 77, 154 and 274 DoD 4000 26-M

810 Invoice

Functional Group=IN

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

Federal Note:

DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. Use a single occurrence of this transaction set to bill or provide adjustments for one or more items provided to a single paying (bill-to) office under DLMS procedures.
2. Users operating under the Defense Logistics Management system (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at <http://www.dla.mil/6/dlms>.
3. Finance and accounting offices, invoicing (billing) offices and other offices use this transaction set to forward DoD Defense Logistics Management System (DLMS) invoices for material and related services exchanged between DoD components and other participating Federal Agencies.
4. The transaction set may include multiple allowances and charges related to those lines of billing or to the invoice as a whole. Use one occurrence of this transaction set to transmit single or multiple transactions.
5. The total number of IT1 and SAC segments may not exceed 495.
6. This DLMS Supplement contains:
 - a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - d. Data elements which have an expanded file size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
7. This transaction may be used to provide Unique Item Identifier (UII) information. Refer to the UII web at URL: <http://www.aq.osd.mil/dpap/sitemap.html> for DoD policy and business rules.
8. This DLMS Supplement incorporates the Proposed DLMS Change and Approved DLMS Change (ADC) listed. PDG/ADCs are available from the DLMSO website: <http://www.dla.mil/6/dlms/elibrary/changes/processchanges.asp>
 - ADC 77, Air Force Unique Management Coding for Material Management Aggregation Code (MMAC)
 - ADC 154, Inclusion of Data Supporting UID of Items on Logistics Bills (DLMS Supplement 810L)
 - ADC 274, DLMS and DLSS Changes to Support Army Exchange Pricing

Heading:

Poa	Id	Segment Name	Req	Max Use	Repeat	Notes	Usage
010	ST	Transaction Set Header	M	1			Must use
020	BIG	Beginning Segment for Invoice	M	1			Must use
030	NTE	Note/Special Instruction	O	100			Used
* 040	CUR	Currency	O	1			Not Used
* 050	REF	Reference Identification	O	12			Not Used

060	PER	Administrative Communications Contact	O	3			Used

LOOP ID - N1 200

004010F810L.DLA01 1 February 19, 2008

PURPOSE: Used to bill and provide refunds for one or more logistics items, including services, provided to a single paying office and chargeable to a single fund code (appropriation) and reimbursable to a single appropriation.

TABLE 1, Header Section. Contains information common to all of the item billings, refunds, and their allowances.

TABLE 2, Detail Section. Contains item billing details and any allowances (reductions or additional charges) directly associated with the item.

TABLE 3, Summary Section. Contains summaries of the details in table 2 and allowances which are not associated with a particular item.

DLSS/DLMS Mapping

- **DAASC-developed program logic to accommodate conversion between DLSS and DLMS**
- **Identifies data content and location within DLSS and DLMS formats**
- **Reflects conditional data which impact data content and location**

810L Logistics Bill

Use of the Tables In Approved DLMS Changes

Item #	Location	Revision to 810L, Logistics Bill	Reason
3.	DLMS Introductory Note:	Added ADC 274 to DLMS Introductory note 8. - ADC 274, DLMS and DLSS Changes to Support Army Exchange Pricing	To identify DLMS changes included in the DS
4.	2/LQ01/310 Table ID Pos	Added qualifier "SEC" with the following DLMS Note: SEC Stock Exchange Code DLMS Note: Use to identify the Exchange Pricing Indicator for intra-Army transactions to identify that the Customer and NIIN on the transaction are Exchange Pricing relevant. An ANSI data maintenance request has been prepared to establish a new data element 1270 code qualifier assignment for Exchange Pricing Indicator. When applicable, cite code value EP (Exchange Pricing). Refer to ADC 274.	Needed to support Army's Exchange Pricing program.

DLSS/DLMS Mapping				
Field Name	DLSS Position	Conditions	Revision to 810L Mapping	810L Position/Loop
Exchange Pricing Indicator	None	If rp 1-3 = FA1, FA2, FD1 or FD2 AND If rp 30 = W AND If rp 60-61 = DB, EP, RB, or SC	LQ01 = SEC LQ02 = EP	2/LQ/310

DC 274 Change to DLMS 810L Implement Army Exchange Pricing

Module 5F Quiz

Question 1: Why don't DLSS Financial Transactions contain actual account numbers?

- a) They are classified
- b) Not enough space
- c) Table look-up is more accurate

Question 2: Where can you find the DLSS to DLMS transaction Cross Reference Table?

- a) DLMSO Web Site
- b) Back of Dictionary
- c) Federal ASC X12 IC

Question 3: What DOD Initiative is Specifically Standardizing Financial Data?

- a) WAWF
- b) SFIS
- b) CRIF

Question 4: Where can the MILS to DLMS Data Maps be Obtained?

- a) DLMS Web Site
- b) DAASC
